

## Project Design Phase-II

### Technology Stack (Architecture & Stack)

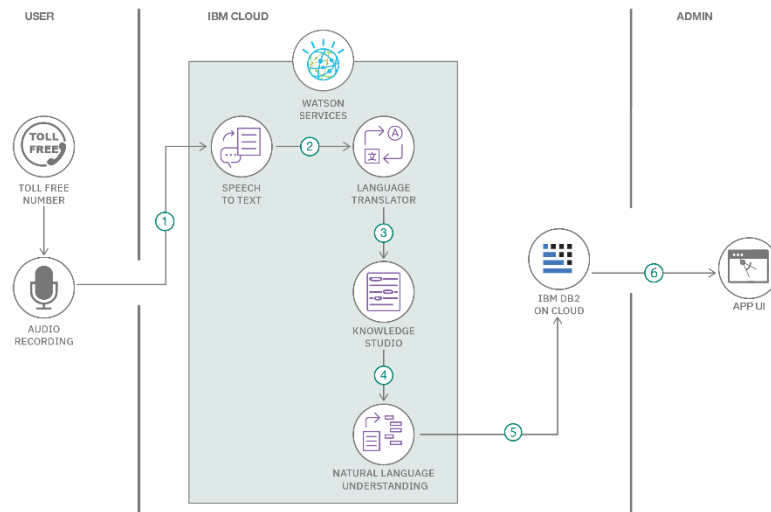

Date	03October 2022
Team ID	PNT2022TMID37643
Project Name	Data Analytics for DHL Logistics Facilities
Maximum Marks	4 Marks

#### Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

#### Example: Order processing during pandemics for offline mode

Reference: <https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/>

#### Guidelines:

1. Include all the processes (As an application logic / Technology Block)
2. Provide infrastructural demarcation (Local / Cloud)
3. Indicate external interfaces (third party API's etc.)
4. Indicate Data Storage components / services
5. Indicate interface to machine learning models (if applicable)

**Table-1 : Components & Technologies:**

S.No	Component	Description	Technology
1.	User Interface	User Uploads the CSV or Excel format files into the Web Pages	HTML, CSS, JavaScript.
2.	Application Logic-1	The user data will pass into the IBM Cloud for storage and act as a data source.	IBM Cloud
3.	Application Logic-2	In cloud data will be fetched by the cognos analytical tool for data analysis	IBM Cognos analytical tool
4.	Application Logic-3	The Pre-trained dashboards will be present to perform analysis on the incoming data.	IBM Cognos analytical tool
5.	Database	Data will be retrieved from cloud.	MySQL.
6.	Cloud Database	Database Service on Cloud	IBM DB2, IBM Cloud.
7.	File Storage	Customer sales data is uploaded in cloud through interface.	IBM Block Storage or Other Storage Service or Local Filesystem
8.	External API-1	To perform data analysis on the user data.	IBM cognos Tool.
9.	External API-2	To built the machine learning model for classification.	Jupiter Note book.
10.	Machine Learning Model	To do the predictive analysis on the Input Data.	Predictive Analysis Model etc.,
11.	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud Local Server Configuration: Using the Flask cloud server. Cloud Server Configuration : IBM Cloud.	Local, Cloud Foundry

**Table-2: Application Characteristics:**

<b>S.No</b>	<b>Characteristics</b>	<b>Description</b>	<b>Technology</b>
1.	Open-Source Frameworks	List the open-source frameworks used	Technology of Opensource framework
2.	Security Implementations	List all the security / access controls implemented, use of firewalls etc.	e.g. SHA-256, Encryptions, IAM Controls, OWASP etc.
3.	Scalable Architecture	Justify the scalability of architecture (3 – tier, Micro-services)	Technology used
4.	Availability	Justify the availability of application (e.g. use of load balancers, distributed servers etc.)	Technology used
5.	Performance	Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc.	Technology used
