### 1. INTRODUCTION

### 1.1 PROJECT OVERVIEW

DHL Logistics Facilities is concerned with getting the products and services where they are needed and when they are desired with the help of Data Analytics. It is difficult to accomplish any marketing or manufacturing without logistical support. It involves the integration of information, transportation, inventory, warehousing, material handling, and packaging.

### 1.2 PURPOSE

Real-time process optimization and simulation are becoming increasingly important tools for supply chain management. As worldwide complexity grows, the ability to run global supply chains at peak efficiency becomes more and more challenging. Warehouse operators and supply chain managers can make better decisions with granular visibility of processes like order management, and inventory levels and resource utilization become transparent in live dashboards. we understand that dynamic technology markets demand dynamic solutions. So we seek strong partnerships with every customer, envisaging and creating the connections to achieve business success. You can rely on our unrivalled global reach, experience and engagement. We'll help you to imagine and enable new approaches and solutions. Together we will push the pace of change. And always we will enrich your experience with our industry-leading logistics services.

# 2. <u>LITERATURE SURVEY</u>

### 2.1 EXISTING PROBLEM

In existing system, DHL is a global expertise in express, air and ocean freight, overland transport and logistics solutions; DHL combines worldwide coveragewith an in-depth understanding of local markets. DHL India has an outstanding reputation in the market for providing a reliable, fast and easy-to-use service. DHL offers Highly trained and professional staff, committed to being responsive to all customers' needs Customer Service Agents, available round-the-clock, 365 days of the year, to serve customers whenever and wherever they need them. Electronic pre-clearance of shipments through Customs Five international gateways proving direct-to-air networks and faster sorting of inbound and outbound shipments.

DHL India is a proven facilitator of trade, across the globe. His strength lies in our global network and the know-how of our people. Backed by strategic alliances with world-class partners and the innovative use of technology, they strive to continuously improve the quality of our service. Our services range from fast, responsive and cost-effective express deliveries toe-commerce fulfillment and intelligent logistics solutions. DHL Core Services consist of

door-to-door air express delivery of documents and parcels of all sizes (and weight), both into and out of the country. Other value added services are a.Kitting/Pre-Assembling

Kitting is the addition of items such as accessories and batteries to the product pack. Pre-assembling is completion of a finished product from component parts or pre-programming of products.

# b. Re-Working/Re-Packing

Repacking for a specific customer can include repalletization. Reworking is the modification of products to suit a local market.

# c. Packaging/Bundling

Packaging includes packing of products into suitable media for transportation and retail display. Bundling is the assembly of a number of prepackaged products to make up an integrated product offering

# d. QA Control

Quality control ensures that product is received into and dispatched from the warehouse in a suitable condition, free from faults and defects. e. Labeling/Merchandising The application of labels either to the product or to the packaging Merchandising can include the addition of price stickers or promotional items ready for retail display.

# 2.3 PROBLEM STATEMENT DEFINITION

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Customer	send parcel	Parcel that I given is damaged	Bulk goods mixed up with my packages	Angry
PS-2	Customer	Get my parcel on time	Parcel is missing	Either delivered in wrong address nor theft issue was occurred	Sad
PS-3	User	Get my package fast	Package still not deliverable and updating wrong	Address is long and server issue	Tempting
PS-4	User	Track driver location status	The product status shown as Delivered	Wrong update by delivery person or server error	Bad
PS-5	Driver	Track customer location	Address found was error	Customer given wrong address	Frustrated
PS-6	Driver	deliver fast	Traffic occurs	big accident on the road lane	Worse
PS-7	Delivery person	Deliver the product	The Customer not avail in the home	They have emergency work	Tired

3. <u>IDEATION & PROPOSED SOLUTION</u>

3.1 EMPATHY MAP CANVAS

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's

behaviors and attitudes.

It is a useful tool to helps teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is

experiencing it. The exercise of creating the map helps participants consider things from the user's

perspective along with his or her goals and challenges.

**Example: Data Analytics for DHL Logistics Facilities** 

3.2 <u>IDEATION AND BRAINSTORMING</u>

**BRAINSTORM AND IDEA PRIORITIZATION TEMPLATE** 

Brainstorming provides a free and open environment that encourages everyone

within a team to participate in the creative thinking process that leads to

problem solving. Prioritizing volume over value, out-of-the-box ideas are

welcome and built upon, and all participants are encouraged to collaborate,

helping each other develop a rich number of creative solutions.

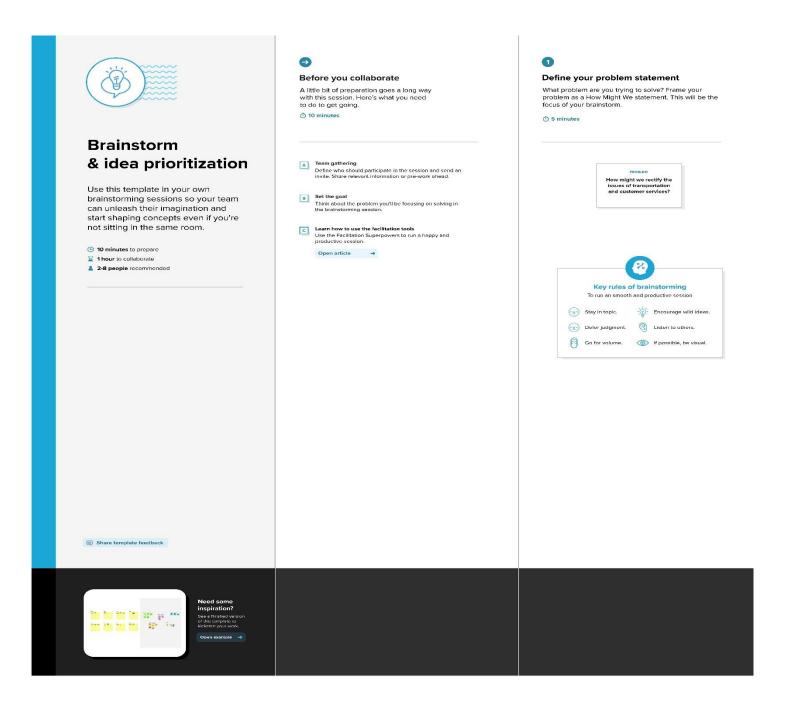

Use this template in your own brainstorming sessions so your team can unleash

their imagination and start shaping concepts even if you're not sitting in the

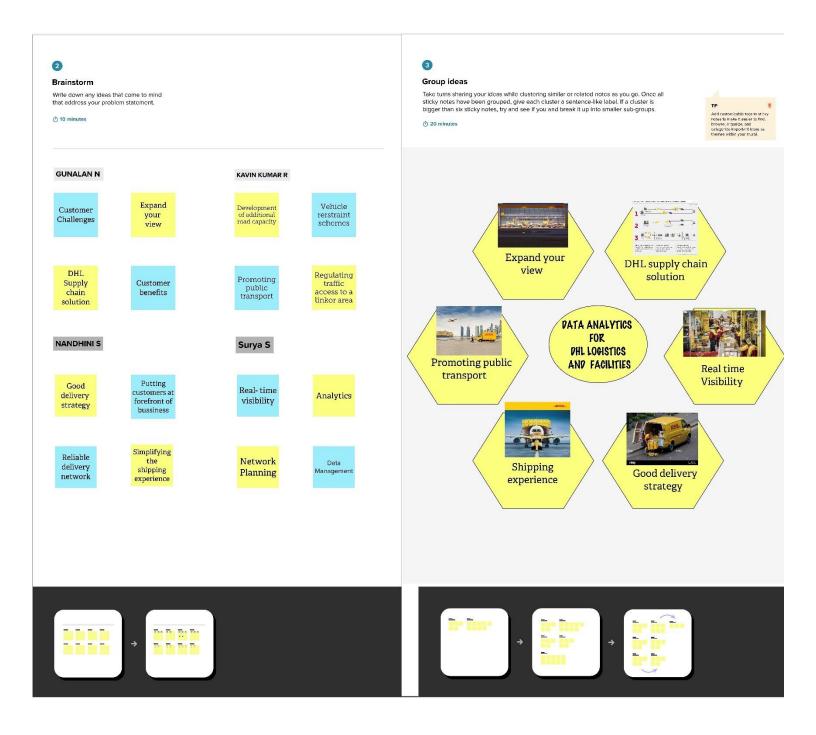

same room.

Reference: https://www.mural.co/templates/empathy-map-canvas

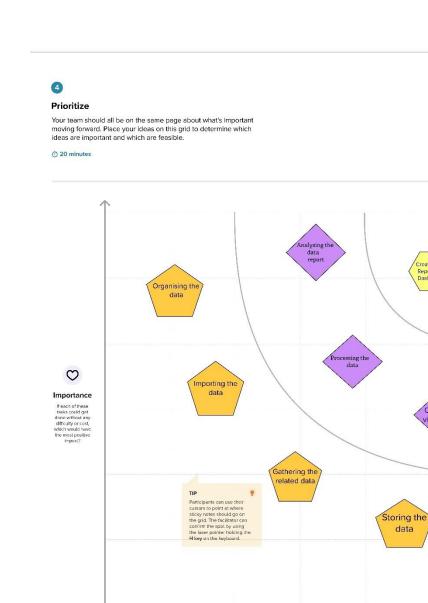

# Step-1: Team Gathering, Collaboration and Select the Problem Statement

# Step-2: Brainstorm, Idea Listing and Grouping

# **Step-3: Idea Prioritization**

### After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

Export the mural
Export a copy of the mural as a PNG or PDF to attach to amails, include in slides, or save in your drive.

Keep moving forward

Define the components of a new idea or strategy.

Open the template  $\rightarrow$ 

### Customer experience journey map

Understand customer needs, motivations, and obstacles for an experience.

Open the template →

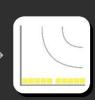

Strengths, weaknesses, opportunities & threats

Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.

# 3.3 PROPOSED SOLUTION

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem	A company's profitability may be
	to be solved)	severely impacted by continually
		shifting dynamics brought about by
		the global nature of the supply
		chain. The enormous burden that
		the COVID pandemic placed on
		logistics made this clear. As a
		result, manufacturers, shippers, and
		retailers are using data analytics to
		better understand their processes
		and optimize them in order to be
		more prepared for unforeseen
		events. Data-driven businesses are

		growing their profit margins and
		customer satisfaction levels as a
		result.
2.	Idea / Solution description	New technology plays a vital part in
		improving operations, removing
		costs and improving customer
		service. With DHL you like
		technology advances and
		investments as we constantly
		review, evaluate and adopt new
		technological solutions. Augmented
		Reality, for instance, is already
		getting used to optimize warehouse
		processes, while a spread of
		automated guided vehicles and

		robots are being tested and assessed
		for future deployment.
3.	Novelty / Uniqueness	The specialist knowledge of your
		team has been the foundation for
		your company's success. By
		entrusting DHL with your logistics,
		you can concentrate on your core
		business rather than being side
		tracked by the requirements and
		complications of the global supply
		chain. DHL offers a wide range of
		ready-to-use solutions,
		technologies, and assets that would
		otherwise take a lot of time and
		money to implement, freeing up
		your cash to expand your business

		in other ways. Furthermore,
		outsourcing your logistics allows
		you the freedom to quickly scale up
		and down in response to new
		opportunities or issues with the least
		amount of risk.
4.	Social Impact / Customer	Customers want to understand
	Satisfaction	when their items are delivered and
		whether a package's expected
		arrival date are later than expected.
		Customers are often happier as they
		get more knowledgeable. Real-time
		or nearly real-time status updates
		are now possible, and businesses
		that make it simple for purchasers
		to urge these logistics updates will
		enjoy higher customer satisfaction.
		Additionally, data can improve

		customer satisfaction in ways aside
		from just shipping monitoring.
5.	Business Model (Revenue	1 – Broker model This is the most
	Model)	common way 3PL works, and the
		one most organizations are probably
		familiar with. In the broker model, a
		3PL buys cargo space in bulk from
		carriers and resells the space to its
		own customers at a premium.
		Oversized, his 3PL can afford to
		purchase large amounts of cargo
		space without delay, and can take
		advantage of economies of scale to
		significantly reduce costs. Even
		with a premium, they're still dealing
		with less than most sole proprietors

could die for outright. 2 – Profit sharing with a profit-sharing model , 3PL works directly with customers to reduce costs. 3

Fee model in the commissionmodel, the 3PL

"works" for the carrier and acts as an intermediary between the carrier and the buyer. From there, it works like some standard commission-based system. Fee models offer a lot of transparency within the process, and in many cases 3PLs can rely on carrier proprietary technology, which rarely leads to the most effective technical solutions.

6. Scalability of the Solution

As market growth requires an expansion of your distribution network, you ideally desire a partner that incorporates a presence within the markets where you wish help. the choice to tapping into a scalable logistics infrastructure is either working with a replacement provider (new relationships to manage, new systems to integrate) or pushing an existing provider to enter new, unfamiliar markets. Look for partners who can walk the talk when it involves exchanging data between your two systems. The provider's size doesn't necessarily correlate with a classy IT capability. Vet providers

return to bite you. The largest 3PL providers will have virtually unlimited scale — a hugely attractive benefit. But their interest is also limited to serving only the most important companies out there. If that's not you, you'll find yourself being the proverbial small fish within the big pond.

### 3.4 PROBLEM SOLUTION FIT

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

## **Purpose:**

- → Solve complex problems in a way that fits the state of your customers.
- → Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- → Sharpen your communication and marketing strategy with the right triggers and messaging.
- → Increase touch-points with your company by finding the right problembehavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- → Understand the existing situation in order to improve it for your target group.

# **TEMPLATE:**

1. CUSTOMER SEGMENT(S)	6. CUSTOMER CONSTRAINTS	5. AVAILABLE SOLUTIONS AS
Our customers are mostly middle-class parents and people living in different environment.	The main constraint is MONEY. We need of a huge investment to process logistics. Another constraint is the customer changes.	Transport - When consumer is at long distance our transport solution may be of use.      Warehouse - Storing of products is main problem.     So, our warehousing solution solves that problem.
2. JOBS-TO-BE-DONE / PROBLEMS J&P	9. PROBLEM ROOT CAUSE	7. BEHAVIOUR
Frequent changing of their changes     A proper feedback.	Many customers alter their changes in their decisions due to their wishes in different products.	They need to be constant at their decisions before giving the final drastic measure.
3. TRIGGERS TR	10. YOUR SOLUTION SL	8.CHANNELS of BEHAVIOUR CH
Due to the various changes made in the environment it triggers the customers to act.	The main and foremost solution in a DHL logistics is to build the customer trust about their product, process and infrastructure.  Because a good atmosphere will definitely	8.1 ONLINE Customers mostly verify their dealers before making a final change. They visit some website about their dealers.
4. EMOTIONS: BEFORE / AFTER  Definitely customers will feel a lack of confidence and trust before acting upon their will. But after they see it with their own eyes they will start to trust and their confidence level will get increased.	develop a good and trustworthy relationships between customer and supplier.	8.2 OFFLINE To verify about their dealers, they will see if thei neighbors has done the same action and they will know what is their confident level.

# 4. REQUIREMENT ANALYSIS

# **4.1 FUNCTIONAL REQUIREMENTS**

Following are the functional requirements of the proposed solution.

FR	<b>Functional Requirement</b>	Sub Requirement (Story / Sub-Task)
No.	(Epic)	
FR-1	User Registration	Registration through any google account or
		social media accounts.
FR-2	User Confirmation	Confirmation via Email
		Confirmation via OTP
FR-3	Dataset	The DHL_Facilities.csv record are collected as
		a dataset and upload to Cognos analytics
FR-4	Prepare/Analyze	The dataset is moved around to prepare and
		analyses using Cognos
FR-5	Exploration	The data are explored using logistics dataset by
		Cognos
FR-6	Dashboard	The Prepared and Explored data are Visualize
		and created in different type of dashboards. i.e.,
		charts, graphs, tree, reports, summary, etc

# **4.2 NON-FUNCTIONAL REQUIREMENTS**

Following are the functional requirements of the proposed solution.

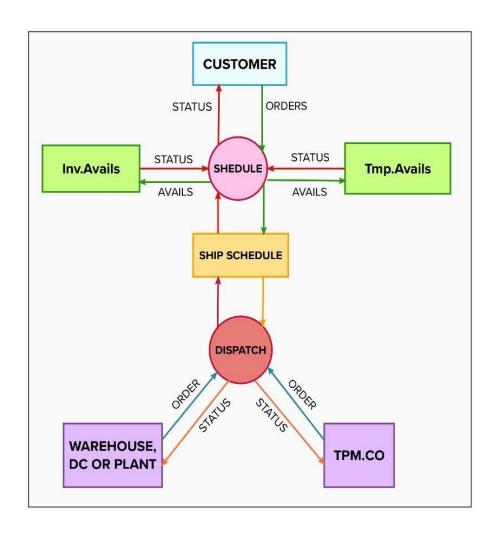

FR	Functional	Sub Requirement (Story / Sub-Task)	
No.	Requirement (Epic)		
FR-1	User Registration	Registration through any google account or	
		social media accounts.	
FR-2	User Confirmation	Confirmation via Email	
		Confirmation via OTP	
FR-3	Dataset	The DHL_Facilities.csv record are	
		collected as a dataset and upload to Cognos	
		analytics	
FR-4	Prepare/Analyze	The dataset is moved around to prepare	
		and analyses using Cognos	
FR-5	Exploration	The data are explored using logistics	
		dataset by Cognos	

### **5. PROJECT DESIGN**

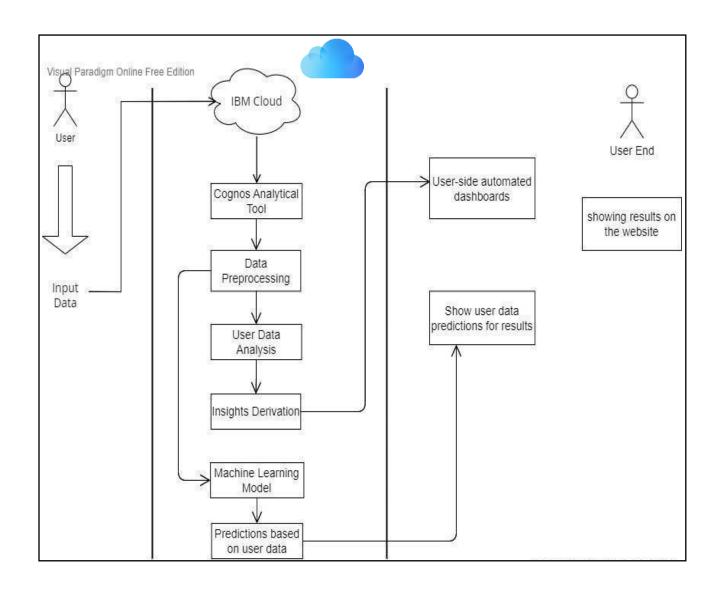

### **5.1 DATA FLOW DIAGRAMS**

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

**Example: (DHL Recommender)** 

# 5.2 SOLUTION AND TECHNICAL ARCHITECTURE

# TABLE 1-COMPONENTS AND TECHNOLOGIES

S.No	Component	Description	Technology
1	User Interface	User uploads the csv or excel format files into the web pages	HTML, CSS, JavaScript
2	Application Logic-1	The user data will pass into the IBM cloud for storing and acts as a data	IBM cloud
3.	Application Logic-2	In cloud, data will be fetched by the Cognos  analytical tool for data analysis	IBM Cognos analytical tool
4.	Application Logic-3	The pre-trained Dashboards will be present to perform analysis on the incoming data	IBM Cognos analytical tool
5.	Database	Data will be retrieved from cloud	MySQL
6.	Cloud Database	Database Service on cloud	IBM DB2, IBM Cloud
7.	File Storage	Customer sales data is uploaded in cloud through interface	IBM Block Storage or Other Storage Service or Local Filesystem
8.	External API-1	To perform data analysis on the user data	IBM Cognos Tool
9.	External API-2	To build the machine learning model for classification	Jupiter Notebook

10.	Machine Learning	To do the predictive analysis on	Predictive analysis
	Model	the input data	model, etc.
11.	Infrastructure (Server /	Application Deployment on	Local, Cloud Foundry
	Cloud)	Local System / Cloud Local	
		Server Configuration: Using	
		the flask Cloud	
		Server Configuration: IBM	
		cloud	

# **TABLE 2-APPLICATION CHARCTERISTICS**

S.No	Characteristics	Description	Technology
1.	Open-Source	List the open-source	Technology of
	Frameworks	frameworks used	Opensource
			framework
2.	Security	List all the security / access	e.g., SHA-256,
	Implementations	controlsimplemented, use of	Encryptions, IAM
		firewalls etc.	Controls, OWASP etc.
3.	Scalable Architecture	Justify the scalability of	Technology used
		architecture(3 – tier, Micro-	
		services)	
4.	Availability	Justify the availability of	Technology used
		application(e.g., use of load	
		balancers, distributed	
		servers etc.)	

5.	Performance	Design consideration	Technology used
		for the performance of	
		the application (number	
		of requests per sec, use	
		of Cache, use of CDN's)	
		etc.	

User Type	Functional Requirem ent (Epic)	Use r Stor y Number	User Story / Task	Acceptan ce criteria	Priority	Release
Customer	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access myaccount / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation emailonce I have registered for the application	I can receive confirmati on email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register &access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail	I can register & access the dashboard with Gmail Login	Medium	Sprint-1

	Login	USN-5	As a user, I can log into the application by entering email & password	I can login into the application with Gmail login	High	Sprint-1
	Dashboard	USN-6	As a user I can usethe methods provided in the Dashboard.	I can access the dashboard withvarious methods	High	Sprint-2
Customer Care Executive	Login	USN-7	As a Customer Care Executive, I can log into the application by entering my Executive email Id & password	I can login withmy credentials	Medium	Sprint-1
	Service	USN-8	As a Customer Care Executive, I can answer user's queries	I can give the solutions to theuser's queries	High	Sprint-3

			tools (Cognos	Accessing		
			and with	tools.		
			ML)			

### **5.3 USER STORIES**

Use the below template to list all the user stories for the product.

### **User Story / Task**

As a user, I can register & log into the application by entering email & password

As a user, I can verify the email with given otp and check for correct subscription access

As an admin I can define questions & goals then collect data & provide the dataset in IBM Cognos analytics

As an admin I can prepare, explore & present the dataset in IBM Cognos analytics

As an admin, I will analyze the given dataset (Data pre-processing)

As an admin, I will predict the length of stay (Prediction)

As a user, I can select the visualization type like

Report, Dashboard and story (Creating visualization)

As a user, I can upload the datasets to the dashboard and view visualizations

As an admin, I can communicate to the client for user queries and visualize the best dashboards in any platform as a user expected

# 6. PROJECT PLANNING & SCHEDULING

# SPRINT PLANNING & ESTIMATION & DELIVERY & JIRA FILES

Use the below template to create product backlog and sprint schedule

Sprint	Functional	User	User Story / Task	Story	Priority	Team
	Requireme	Story		Points		Member
	nt(Epic)	Number				S
Sprint-1	Login	USN-1	As a user, I can	10	High	Nandhini
			register &log into			S
			the application by			
			entering email &			
			password			
Sprint-1	Verify	USN-2	As a user, I can	10	High	Kavin
			verify theemail			Kumar R
			with given otp			
			and check for			
			correct			
			subscription access			
Sprint-2	Collect Data	USN-3	As an admin I can	10	High	Nandhini
			define questions			S
			& goals then			
			collect data &			
			provide thedataset			
			in IBM Cognos			
			analytics			
Sprint-2	Prepare &	USN-4	As an admin I can	10	High	Gunalan
			prepare,explore &			N
	Explore		present the			

			dataset in IBM Cognos analytics			
Sprint-3	Analyze	USN-5	As an admin, I willanalyze the given dataset (Data pre- processing)	10	High	Surya S
Sprint-3	Predict	USN-6	As an admin, I will predict the length ofstay (Prediction)	10	High	Kavin Kumar R
Sprint-4	Visualizatio n	USN-7	As a user, I can select the visualization type like Report, Dashboard and story (Creating visualization)	7	Mediu m	Surya S
Sprint-4	Dashboard	USN-8	As a user, I can upload thedatasets to the dashboard and view visualizations	8	High	Gunalan N
Sprint-4	Communica te	USN-9	As an admin, I can communicate to the client for user queries and visualize the best dashboards in any platform as a user expected	5	Low	Nandhin i S

# PROJECT TRACKER, VELOCITY & BURNDOWN CHARTS

Sprint	Total	Duratio	Sprint	Sprint	Story	Sprint				
	Stor	n	Start	EndDate	Points	ReleaseDate				
	y		Date	(Planned	Complet	(Actual)				
	Point			)	ed(as on					
	s				Planned					
					End Date)					
Sprint-1	20	6 Days	24 Oct	29 Oct 2022	20	29 Oct 2022				
			2022							
Sprint-2	20	6 Days	31 Oct	05 Nov	20	05 Nov 2022				
			2022	2022						
Sprint-3	20	6 Days	07 Nov	12 Nov	20	12 Nov 2022				
			2022	2022						
Sprint-4	20	6 Days	14 Nov	19 Nov	20	19 Nov 2022				
			2022	2022						

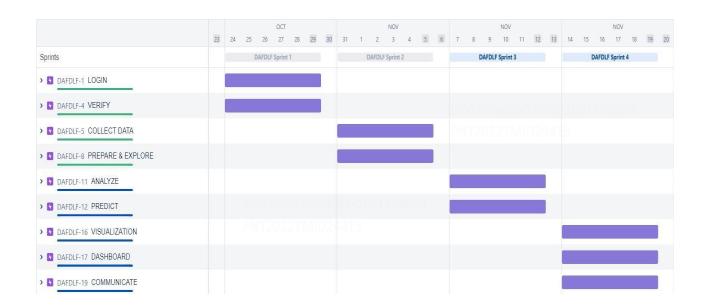

# **Velocity:**

We have a 10-day sprint duration, and the velocity of the team is 20 (points persprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

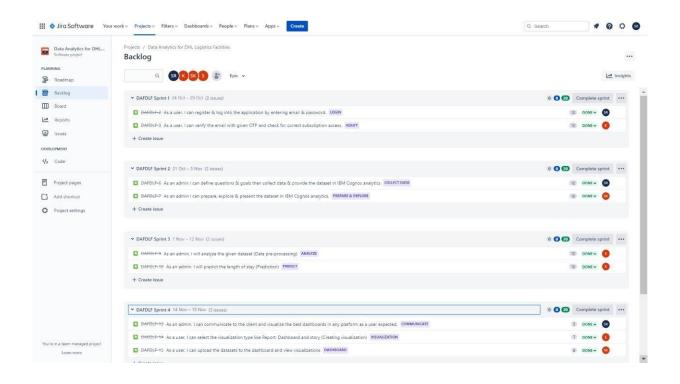

$$AV = \frac{sprint\ duration}{velocity} = \frac{20}{10} = 2$$

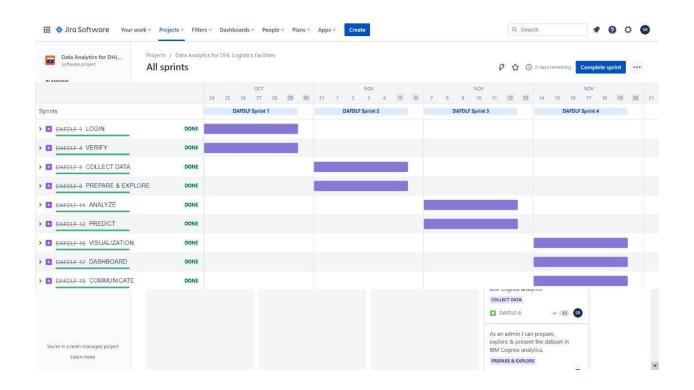

### **BURNDOWN CHART**

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.

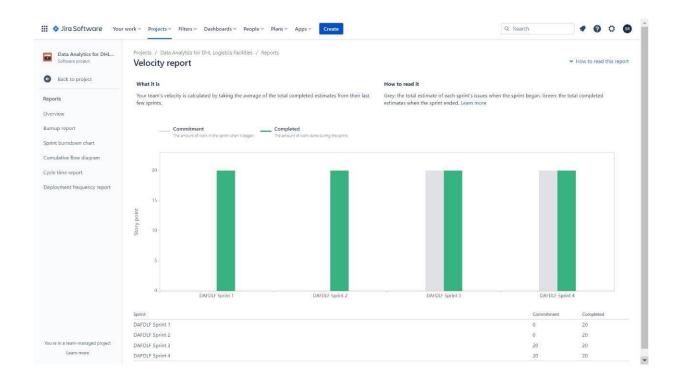

#### REPORTS FROM JIRA

DHL is an international Umbrella brand and trademark for the courier, package delivery, and
express mail service which is a division of the German logistics firm Deutsche Post. The
company group delivers over 1.6 billion parcels per year. The company DHL itself was
founded in San Francisco, USA, in 1969 and expanded its service throughout the world by the
late 1970s.

### 7.3 Data Schema

## 8. TESTING

## 8.1 MODEL PERFORMANCE TESTING

Project team shall fill the following information in model performance testing template.

S.No	Parameter	Screenshot / Values
1.	Dashboard design	20/6
2.	Data Responsiveness	The final output from IBM Cognos With
		Watson further converted into PDF or Story
		file, So it can be viewed by alldevices.
3.	Amount Data to	0 KB
	Rendered(DB2	
	Metrics)	
4.	Utilization of Data Filters	The Utilization of data Filters like Ascending ,Descending
	Titters	,Descending
		Format and so on.
5.	Effective User Story	15
6.	Descriptive Reports	20 /6`

### 8.2 ACCEPTANCE TESTING

### PURPOSE OF DOCUMENT

The purpose of this document is to briefly explain the test coverage and open issues of the DHL Logistics project at the time of the release to User Acceptance Testing (UAT).

### **DEFECT ANALYSIS**

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved

Resolutio	Sever	Severi	Severi	Severi	Subto
n	ity 1	ty 2	ty 3	ty 4	tal
By Design	6	6	4	0	16
Duplicate	0	0	0	0	0

External	8	5	2	0	15
Fixed	12	9	4	7	32
Not	1	1	0	0	2
Reproduced					
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	27	21	10	7	6
					5

## **TEST CASE ANALYSIS**

This report shows the number of test cases that have passed, failed, and untested

Section	Total	Not	Fa	Pas
	Cases	Tested	il	S
Print Engine	8	0	0	8
Client Application	51	0	0	51
Security	4	0	0	4
Outsource Shipping	3	0	0	3
Exception Reporting	8	0	0	8
Final Report Output	5	0	0	5
Version Control	2	0	0	2

### 9. RESULTS:

### 9.1 PERFORMANCE METRICS

## **Shipping Time:**

Spot potential issues in your order fulfilment process

## Order Accuracy:

Monitor the degree of incidents

## **Picking Accuracy**:

How many orders are picked without errors?

## **Delivery Time**:

Track your average delivery time in detail

### Pick & Pack Cycle Time:

Track the time it takes to pick and pack your orders

## **Equipment Utilization Rate:**

Analyze all costs from the order placement to delivery
Warehousing Costs:
Optimize the expenses of your warehouse
Pick & Pack Costs:
Monitor all costs related to your pick & pack process
Use of Packing Material:
Optimize your materials usage
Number of Shipments:
Understand how many orders are shipped

Is your equipment enough for your workforce?

<u>Transportation Costs</u>:

### **Inventory Accuracy:**

Avoid problems because of inaccurate inventory

### **Inventory Turnover:**

Track how many times your entire inventory is sold

## <u>Inventory to Sales Ratio</u>:

Identify a potential overstock

**KPIs for Each Stage of Logistics** 

Logistics KPIs

### 10. ADVANTAGES AND DISADVANTAGES

#### PROS OF DHL LOGISTICS FACILITIES

Understanding the aspects of the logistics sector and the advantages that it can bring can be extremely insightful to your organization. Logistics has a series of advantages, which include the following:

- Enhanced Distribution Network When having a good logistics system, with different logistics operators, you are able to optimize the times along with the distribution chain. There are a variety of companies out there that are available to take care of your logistics needs at a national and international level.
- Costs Reduction Due to automated facilities and other globalized distribution systems, transport cost and handling costs are able to be reduced. A more efficient logistics chain will improve both final customer satisfaction and the service.
- Delivery Fulfillment Delivery fulfillment is extremely important to modern-day customers. In an era of instant-gratification, consumers are looking for their product the second they push the "buy" button. Through

adequate logistical processes, delivery times have been greatly reduced as compared to a few years ago.

While there are many advantageous associated with the logistics sector, there are also a variety of disadvantages as well.

#### CONS OF DHL LOGISTICS FACILITIES

In the logistics sector, there are different aspects to consider that have a great influence. This can be globalization, technology, consumer evolution, legal aspects, or government policies. These aspects directly influence the logistics sector and may hinder its ability to thrive. Here are a few of the disadvantages pertaining to the logistics sector:

- Multinational One of the most consistent disadvantages pertains to the sector being covered with substantially larger companies. This makes it very difficult for medium and small companies to have access to this, due to the costs associated with it.
- Cost of Transport A greater distance to travel will only make the cost greater as well. This will make it difficult to get a competitive price.
   Transportation is by far the greatest cost of the logistics sector.

• Legality - Barriers pertaining to entry and exit can also be a hurdle to overcome, considering that each country and state can have its own say on logistical practices. This is definitely a major concern for some areas within the United States, especially on some issues such as marijuana legalization.

### 11. CONCLUSION

Logistics systems and transportation consist of interdependent relationships that logistics management requires transportation to perform its day-to-day activities and meanwhile, a good logistics system can efficiently improve transportation development and traffic environment. Since transportation contribute the highest cost among the related elements in logistics systems, the improvement of transport efficiency can change the overall performance of a logistics system. Transportation plays an important role in logistics system and its activities appear in various sections of logistics processes. Without the linking of transportation, a powerful logistics strategy cannot bring its capacity into full play.

The review of logistics system in a broad sense might help to integrate the advantages from different application cases to overcome their current demerits. Review of transport systems provides a clear notion on transport applications in logistics activities. Development of logistics will be still vigorous in the following decades and the logistics concepts might be applied in more fields.

### 12. FUTURE SCOPE

Data Analytics for DHL Logistics Facilities is all about making the right product available to the right customer at the right time and at right cost.

With average purchasing power increasing, consumerism is on the rise in India. Indians are buying more and more with each passing day and this rise is here to stay. Given there is a trend of an increasing demand, companies are flooding Indian markets with their offerings, competing with each other in terms of enhanced products, better and easy shopping experience etc.

This trend can be seen across companies. There are more brands of, say toothpaste, to choose from. There are different toothpastes for different needs, different taste etc. Similarly there are more options of cars, televisions, clothes, juices, biscuits etc available to consumer than what were available, say a decade back. All these options need to be made available to the consumers (right from procuring raw materials to making it available on shelf).

Hence I believe, as long as there are companies competing against each other to satisfy consumers, there is a good scope for SCM in India to ensure these

products reaches from raw material stage to consumer at the right time and the at right cost.

DHL is an international Umbrella brand and trademark for the courier, package delivery, and express mail service which is a division of the German logistics firm Deutsche Post. The company group delivers over 1.6 billion parcels per year. The company DHL itself was founded in San Francisco, USA, in 1969 and expanded its service throughout the world by the late 1970s.
